

# CAC/PIV Authenticator for Atlassian

For enterprise-class security and access control across your Atlassian products

Smart cards provide convenient, secure access to systems for US government offices. Goldfinger's CAC (Common Access Card)/PIV (Personal Identity Verification) Authenticator extends smart card access control to all your Atlassian products. The solution helps you manage complex security permissions and makes sure the right people have the right access.

## Easy sign-on

Grants users quick and easy sign-on options.

## Secure access

Ensures secure access to all your Atlassian tools with encrypted identity.

## Advanced compatibility

Provides access to all supported applications at once. Easily customize accessibility to applications with permissions.

## Supports CAC cards

Supports US Government and NATO Common Access Card (CAC) and Personal Identity Verification (PIV) cards.

### Atlassian products supported:

- ◆ Jira Software
- ⚡ Jira Service Desk
- ⬅ Jira Core
- ✂ Confluence
- ▣ Bitbucket
- 🔄 Bamboo
- 🛡 Crowd

The plugin is also compatible with Atlassian Data Center products.
